### Information Security

#### CyberSec First Responder™ / 3495 USD / Days: 5

This course covers the duties of those who are responsible for monitoring and detecting security incidents in information systems and networks, and for executing a proper response to such incidents. Depending on the size of the organization, this individual may act alone or may be a member of a cybersecurity incident response team (CSIRT). The course introduces tools and tactics to manage cybersecurity risks, identify various types of common threats, evaluate the organization's security, collect and analyze cybersecurity intelligence, and handle incidents as they occur. Ultimately, the course promotes a comprehensive approach to security aimed toward those on the front lines of defense.

### ITIL

#### ITIL® Expert - Managing Across the Lifecycle (MALC) / 3870 USD / Days: 5

Managing Across the Lifecycle provides a holistic picture of the critical learning points and knowledge IT management staff require on key organisational topics such as: governance structures, roles, functions, process dependencies, complementary frameworks, service assessments and the management of change issues related to the ITIL Service Lifecycle. After taking this course, delegates will be better equipped to understand the strategic design, deployment and management of the capabilities and resources required by the full IT Service Lifecycle. This course prepares delegates for the examination leading to the ITIL Certificate: Managing Across the Lifecycle. This is a free-standing qualification, but is also the final module of the Service Lifecycle and/or Service Capability modules that leads to the ITIL Expert certification. Specifically, this course addresses the interfaces, interactions and organisational requirements between the processes addressed in the five core ITIL publications: Service Strategy, Service Design, Service Transition, Service Operation and Continual Service Improvement.

#### ITIL® Intermediate Capabilities - Operational Support and Analysis / 3095 USD / Days: 5

ITIL Service Capability Modules focus on a deep level of understanding of ITIL processes and roles, how they are implemented and how they interact. The modular approach of the Intermediate Level modules allows candidates to develop an ITIL specialism. The Operational Support & Analysis module will help you to gain the technical level of knowledge and skills required for detailed execution and implementation of specific ITIL processes.

The ITIL Intermediate certificate in Operational Support & Analysis (OSA) is a course that can be run over four or five days (depending upon the requirements of the training group). Delegates attending this course will gain a comprehensive understanding of ITIL Service Management as it applies to the Operational Support & Analysis processes, aligned to the current version, ITIL: 2011. Delegates will also prepare for and sit a 90 minute, complex multiple-choice examination. The course consists of lectures, detailed group exercises, discussions, examination technique training, mock examinations and culminates in an invigilated exam on the final day.

### 20744 Securing Windows Server 2016 / 2975 USD / Days: 5

This course teaches IT professionals how they can enhance the security of the IT infrastructure that they administer. This course begins by emphasizing the importance of assuming that network breaches have occurred already, and then teaches you how to protect administrative credentials and rights to help ensure that administrators can perform only the tasks that they need to, when they need to.

This course explains how you can use auditing and the Advanced Threat Analysis feature in Windows Server 2016 to identify security issues. You will also learn how to mitigate malware threats, secure your virtualization platform, and use deployment options such as Nano server and containers to enhance security. The course also explains how you can help protect access to files by using encryption and dynamic access control, and how you can enhance your network's security.

### Project Management Essentials / 1797 USD / Days: 3

If you are taking this course, you probably have some exposure to managing projects, or you may be considering embarking on a career as a professional project manager. Your ability as a project manager to demonstrate best practices in project management on the job is becoming the standard to compete in today's fast-paced and highly technical workplace. In this course, you will apply the generally recognized practices of project management to successfully manage projects.

Project managers are always under severe pressure to complete projects on time and within budget. However, most projects fail to meet these demands, and, as a result, many projects are terminated early. Successful project management requires knowledge and experience. This course is designed to provide you with the skills needed to be a successful project manager in today's rapidly changing world. The skills and knowledge you gain in this course will help you avoid making costly mistakes and increase your competitive edge in the project management profession.
